GLASSFLAKE EPOXY COATINGS – WE'VE GOT IT COVERED

As a major supplier of high quality protective coatings for the last 150 years, Leighs Paints understands the challenges associated with the protection of structures in hostile environments. That is why we have developed a new epoxy glass flake coating to meet your needs; Epigrip C123.

The product includes micronised glass flake and zinc phosphate pigments, enabling Epigrip C123 to withstand the most aggressive of environments whilst delivering exceptional protection to steel structures.

Focus

on Anti-Corrosion Epigrip C123

THE DIFFERENCE

Epigrip C123 is a high build durable coating which offers long term corrosion protection for structural steelwork, bridges and transport infrastructure in aggressive environments.

Features	Benefits
Glass Flake Pigment	The glass flake particles provide excellent barrier protection. The particles align themselves within the film, parallel to the substrate, to give barrier protection and physical reinforcement.
Micronised Glass Flake	Allows a wide range of specifications at dry film thickness from 200µ to 600µ by airless spray.
Contains Zinc Phosphate	Providing excellent anti-corrosion protection.
High Solids and Low VOC	83% solids volume.
High Build	Can achieve up to 600µ in one coat.
Excellent Mechanical Properties	Providing excellent film strength, durability and abrasion resistance.
Excellent Track Record	Re-engineered from an existing product with a 20 year track record, gives you the confidence it will perform when you need it most.
Approvals	Independently tested and certified to Network Rail specification 7.2.3 requirements, and is tested to the requirements of Highways Agency Item 123 specification.
Good Aesthetics	Excellent film formation, even at lower thickness, providing superior aesthetic appearance in comparison to traditional high build glass flake coatings.

SUPPORT & SERVICE

Working with you to find the most effective solution, Leighs Paints' experienced Technical Services team are on hand to offer you the support you need. Whether you require a bespoke specification, site survey or assistance, our team of experts offer you complete backup at all stages of your project.

Coupled with our dedicated Customer Services and Supply Chain teams, you can feel confident that you will receive the product you require, on time and in full when you need it most.
