steel

Over **50 years experience** of working with the **structural steel industry**, has taught us that no two projects are ever the same, but we like that. At **Leighs Paints** we crave new and **exacting challenges**; it's what **keeps us ahead** in a highly competitive marketplace.

The structural steel industry poses some of the most unique and technically demanding situations, and we can't help but get a buzz of excitement from providing solutions for its challenges; it's what we do best.

Through our knowledge, creativity and passion for paint, Leighs Paints has produced a world class range of high performance protective coatings designed specifically to meet the needs of the steel industry.

The background of the slide features a low-angle, upward-looking view of several industrial robotic arms in a factory. The arms are light grey and extend from the bottom and sides towards the top of the frame. The lighting is bright, highlighting the metallic surfaces and joints of the machinery. The overall aesthetic is clean and modern, emphasizing industrial precision and automation.

We've got **it!**

Whatever the **size**, wherever the **location**; **Leighs Paints** has made it its **mission** to provide you with **coating solutions** which **fulfil** the **aims** and **ambitions** of your **project**. We recognize that to protect your assets you require the **very best** in **protective coatings**, and we **aim to please**.

Fire protection

Allowing the steel elements of your project to become an architectural feature, our **FIRETEX® FX** Range of intumescent coatings are designed to provide you with cost effective, yet aesthetically pleasing solutions which don't compromise on quality or safety.

Offering coatings for both shop and site application; be it solvent or water based, our thin film coatings can protect steelwork for up to 120 minutes, depending on requirements.

Primers

The heart of any anti-corrosion solution; our range of primers will work tirelessly to protect your assets. Whether you require quick drying blast primers, epoxy primer build coats or one coat primer finishes, Leighs Paints will provide you with cost effective, quick drying solutions with great overcoat-ability.

Topcoats

They say the devil is in the detail, which is why we have developed a range of functional, yet decorative topcoats designed to provide you with a finish that compliments your design.

Whether you require a sheen, gloss or matt finish, in Signal Red or Dark Violet, our extensive range of high performance topcoats, in a vast range of shades, are tested to the extremes to ensure they keep your structure looking good long term.

Bringing it all together

Our primers and fire protection coatings are not only designed to work in solitude, but are designed to work together along with our topcoats to provide you with a one stop solution, which meets industry standards worldwide. Their enviable track records will give you the confidence you need to believe they will perform when you need them most.

Outside of the tin

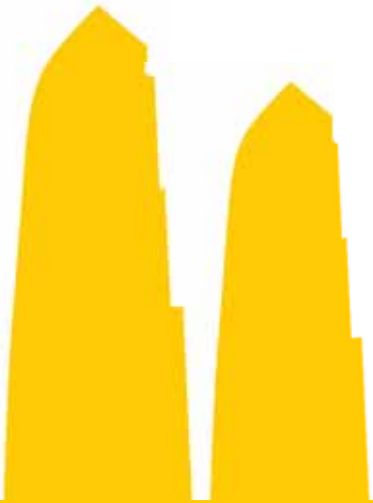

Simply providing you with the paints in our tins is not enough for us, we go beyond that.

With dedicated teams of people in all corners of the world, on hand to help you with every aspect of your project, Leighs Paints ensures that what you find outside of the tin is just as good as what you find in the tin.

Whether you require the support of our experienced Technical Services team, or the guidance of our Customer Services department, we provide complete back up at every stage of your project.

Why not take full advantage of our Fire Estimation and Engineering team, whose unique blend of structural engineering experience and fire expertise, allow them to assist you with fire engineering solutions as early as concept stage.

Or speak with our leading Supply Chain unit about the deadlines for your project, so we can ensure that they are met on time and in full. Coupled with our world class research and development facility we are able to push the boundaries, and develop new products fast whilst offering you high end results.

The Leighs Paints' way

We love paint. It's our passion, it's what we do. In fact we love it so much that we have been leading the way in the protective coatings industry since 1860.

Founded by two brothers, William and Joshua Leigh, our drive and determination to be the best at what we do has never wavered. In fact with the fourth generation of the Leigh family on board it's stronger today than it ever has been, as we push the business into new and ever demanding markets.

Our unique culture and exceptional service has ensured that our customers return to us time-after time. Perhaps this is the best testament to our ability to produce world class protective coatings, which exceed customer's expectations.

At Leighs Paints we believe it's not what we do in a day, but how much we love doing what we do that makes the difference. It's the Leighs Paints' way.
